Description :

Microslide The Circulatory System (Product Code: SLE/PS/99) is a set of 8 related 35 mm photographs taken through a microscope, used to teach the blood, blood vessels, lymph vessels and heart in secondary biology. Alongside human blood, a phagocyte and an artery with its vein,it includes two views of a rat heart at 4x and 6x and a close-up of the valve at the aorta. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, as part of its range of school biology lab equipment in India.

Specifications

Parameter	Detail
Images per set	8 related 35 mm images photographed through a microscope
Blood	Human Blood; Phagocyte
Vessels	Artery and vein; Lung capillaries; Lymph vessel and valves
Heart	Rat Heart (4x); Rat heart (6x); Valve at aorta
Callouts	Arrows and callouts guide students to key features
Folder	Detailed text folder to inform and question students; handy pocket stores the Microslides
For use in	Microslide Viewer
Product code	SLE/PS/99
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Microslide The Circulatory System Used For?

The set gives a class a microscope-level view of the transport system without cutting or staining tissue. A typical sequence starts with human blood and a phagocyte, then compares the thick wall of an artery with its matching vein, and moves to the thin capillaries of the lung where exchange with the air takes place.

The lymph vessel with its valves shows the second, one-way return route for tissue fluid, and the rat heart images at 4x and 6x, followed by the valve at the aorta, help students see why valves stop blood flowing backwards. Viewed in a Microslide Viewer, with callouts on each frame, the set is a practical way to back up a heart model or a glass slide practical.

What to Specify When Ordering

- The number of Microslide The Circulatory System sets
- Whether you also need Microslide Viewers
- Whether a glass slide set of circulatory tissue should be quoted for microscope practicals
