Product Name :

Human Egg Model

Product Code :

SLE/A/159

Description :

The **Human Egg Model** (Product Code: SLE/A/159) is a teaching model of the human egg, or ovum — the female gamete that joins with a sperm at fertilisation. Mounted on a base so it stands securely on a bench or display shelf, it gives teachers a clear visual starting point for lessons on human reproduction. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, and is a straightforward item to include when planning a biology lab setup for a school in India.

Key Details

Parameter	Detail
Type	Teaching model of the human egg (ovum)
Mounting	Mounted on base
Purpose	Visual aid for lessons on the female gamete, ovulation and fertilisation
Suitable for	School biology, college zoology, and nursing or health education classes

Typical Use

A real human egg is barely visible to the naked eye, so a model is the easiest way to discuss it with a group. Teachers use it to explain that the egg is far larger than a sperm cell, that it carries stored nutrients and half of the genetic material a new individual needs, and that it is surrounded by protective layers a sperm must pass through before fertilisation.

Placed next to a sperm model, it lets students contrast the two gametes in size, shape and role; it is also a helpful prop when explaining the menstrual cycle, ovulation and the start of pregnancy in health education sessions. Within a human biology model set it pairs naturally with sperm, embryo and pelvis models.

Manufacturer

Jain Scientific Equipments Private Limited, which trades as ScienceLab, manufactures anatomical teaching models such as this one in Ambala, Haryana, for schools, colleges and distributors. Further information is available on the company profile.

Related Human Models

Models that complete a lesson on gametes and fertilisation:

- Human Sperm Model — the matching male gamete model for comparison lessons
- Embryo Model — shows what develops after fertilisation
- Human Female Genital Organs Model — the organs in which eggs mature and are released
- Female Pelvis Model — a median-section view of the female pelvic organs
