Description :

Magnifier, Folding (Product Code: SLE/PHY/101) is a compact 4x hand lens used to enlarge small objects and fine detail for close inspection in classrooms, laboratories and field studies. Students and teachers carry it on nature walks and in practical lessons, and its 25 mm lens is fitted in a folding frame that protects it when closed. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, as a handy hand lens magnifier for schools in India.

Specifications

Parameter	Detail
Type	Folding, lens fitted in frame
Magnification	4x
Diameter	25 mm
Listing note	“Triple” — please confirm the lens arrangement when you enquire
Product code	SLE/PHY/101
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Folding Magnifier Used For?

A folding magnifier is the everyday tool for looking closely at leaf veins, insect legs, seeds, crystals, fabric weave or small print. At 4x it reveals detail the naked eye misses, while keeping a wide enough view for beginners to find their subject quickly. Because the lens folds away, it can travel in a pocket or field bag on outdoor ecology lessons without getting scratched.

For the sharpest view, hold the lens close to the eye and move the object, not the lens, until it comes into focus; daylight or a desk lamp helps. In physics lessons the same magnifier illustrates how a converging lens forms an enlarged, upright virtual image when the object sits inside its focal length. Many school labs in India keep one as a pocket magnifier loupe for quick checks, wiping it with a soft cloth and folding it closed after use.

What to Specify When Ordering

- Quantity — one per student, or one per pair for group work.
- Magnification and size: 4x with a 25 mm diameter lens, as listed.
- The “Triple” note in the listing — confirm the lens arrangement you need.
- Whether a lens cleaning cloth should be quoted with the magnifiers.

Supplier

Jain Scientific Equipments Private Limited, which trades as ScienceLab, supplies the Magnifier, Folding alongside its wider range of school science equipment. The company sources this magnifier for its customers, so schools and dealers can add it to a larger laboratory order and deal with a single supplier.
