Description :

Viruses & Bacteria Poster (Product Code: SLE/BL/060) is a laminated wall chart used to help students identify the most prevalent viruses and bacteria and understand how they cause harm to humans in biology and microbiology lessons. Teachers rely on its detailed illustrations and photographs, printed on an 890mm W x 585mm H sheet that suits busy classrooms. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a biology lab equipment supplier in India, as a visual companion to a microbiology teaching kit.

Specifications

Parameter	Detail
Type	Microbiology wall poster
Dimensions	890mm W x 585mm H
Finish	Laminated
Content	The most prevalent viruses and bacteria, shown with detailed illustrations and photographs
Learning focus	How to identify these agents and how they cause harm to humans
Product code	SLE/BL/060
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Viruses & Bacteria Poster Used For?

Viruses and bacteria are too small to see without a microscope, so a well-illustrated chart gives students a reference point before they meet them in practical work. Teachers use the poster to explain the difference between the two groups — living cells versus particles that need a host — and to discuss how each one enters the body and causes illness. It is a natural backdrop for lessons on hand-washing, vaccination and the sensible use of antibiotics.

In the lab, students can compare the photographs with prepared microscope slides of bacteria to practise recognising shapes, then return to the poster to connect each organism with the harm it does. Because the surface is laminated, it can be wiped clean and suits a busy practical room or a microbiology prep area, making it a sensible addition to microbiology lab equipment in India's schools and colleges. Mount it where the whole class can see it and where it will not be splashed.

Supplier

The Viruses & Bacteria Poster is supplied by **Jain Scientific Equipments Private Limited**, whose trading name is **ScienceLab**, based in Ambala, Haryana, India. The company serves schools, colleges and institutes in India and international markets, and can combine this chart with prepared slides and other posters in one order — visit the company profile to learn more.
