Description :

Teaching Tank 12 Inch Basic (Product Code: SLE/EBT/24) is a 12 inch classroom observation tank used to run easy experiments on roots, worms or ants and to build basic skills of observation and conceptual learning. It includes a Teacher's insert, can be turned into a small aquarium, and suits learners from nursery to college. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, as part of its range of biology teaching aids for schools.

Specifications

Parameter	Detail
Size	12 inch (Basic version)
Type	Teaching tank for observation-based classroom experiments
Observation uses	Roots, worms or ants
Included	Teacher's insert
Add-on	12" Expansion Kit for a wider variety of hands-on experiments
Other use	Can be set up as a small aquarium
Level	Nursery to college
Product code	SLE/EBT/24
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Teaching Tank Used For?

In early years and primary classes the tank is filled with moist soil and a few seeds are planted close to the viewing side, so children can draw the roots and shoots each day and notice that roots grow downwards whichever way the seed was placed. Later the same tank can become a wormery with layers of soil and sand, letting pupils watch earthworms mix the layers, or an ant habitat for observing tunnelling. Each set-up practises the same core skill — careful, repeated observation recorded in a notebook.

Set up as a small aquarium, it can hold pond water with aquatic plants and small invertebrates for lessons on habitats and food chains. Keep the tank out of direct sunlight, return living animals to their habitat after the study, and wash the tank between projects. Adding the 12" Expansion Kit widens the range of experiments, making the tank a flexible item in a school biology lab setup.

What to Specify When Ordering

- The number of Teaching Tank 12 Inch Basic units, for example one per class or per group.
- Whether the 12" Expansion Kit should be quoted with the tanks.
- Whether you also want a dedicated aquarium tank for a permanent class aquarium.
- The delivery address and any tender or purchase-order format required.
