Handle Skin Grafting Small (Product Code: SLE/BL/36) is a small stainless steel handle for a skin grafting instrument — the hand-held tool used to cut thin sheets of skin for covering wounds and burns — used in surgical instrument sets and in instrument training. Our product details describe it as corrosion proof and highly reliable for medical application, and nursing, paramedical and surgical teaching units also use it for recognition practice. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Parameter	Detail
Type	Skin grafting handle, small
Material	Stainless steel
Property	Corrosion proof
Intended application	Medical application
Blade	Not mentioned in our product details — confirm compatibility when enquiring
Product code	SLE/BL/36
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

The handle carries the cutting part of a free-hand skin grafting instrument. In a grafting procedure the donor area is prepared, the instrument is drawn across the skin at a shallow angle, and a thin graft is lifted and moved to the wound or burn that needs covering.

What to Specify When Ordering

- Which handle pattern you need — this Small handle or the Eschman Type in the same range
- The grafting blades or knives you already use, so fit can be checked
- Quantity per instrument set or training group
- Whether the handle is for teaching sets or clinical use, and any documentation you need

Jain Scientific Equipments Private Limited, trading as ScienceLab from Ambala, Haryana, India, supplies this small skin grafting handle within its surgical instruments range. As a laboratory instruments supplier in India, the company exports it for various medical colleges, hospital training and research centres. It is used before and after skin grafting.
