Description :

The **Dropper Bottle, 10 ml** (Product Code: SLE/CH/122) is a small white bottle made from durable, chemical resistant polypropylene, fitted with a leakproof lid and a removable dropper. It lets students dispense indicators and reagents one drop at a time, which saves chemicals and keeps small-scale practicals tidy. Dishwasher proof and designed to be used repeatedly, it is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a lab plastic ware supplier India schools and colleges order from for everyday bench items.

Specifications

Parameter	Detail
Capacity	10 ml
Material	Durable polypropylene
Colour	White
Chemical resistance	Chemical resistant
Closure	Leakproof lid
Dropper	Removable
Cleaning and reuse	Dishwasher proof; can be used repeatedly

Typical Use

Small dropper bottles are the standard way to put indicators, test reagents and stains within reach of every student group. A set of labelled bottles on each bench might hold litmus or universal indicator, dilute acid and alkali, or a biological stain, so students add exactly the number of drops a method calls for instead of pouring. They are particularly useful in microscale chemistry, where reagents are dropped straight into the wells of a plate, and in teaching stations built around an acid base indicator kit where several solutions must be kept separate.

Label every bottle clearly and never swap droppers between bottles, as that is the quickest route to cross-contamination. The removable dropper makes refilling easy and lets the bottle and dropper be cleaned separately; after rinsing, both can go through a dishwasher and back into service. Keep the lid closed when not in use and store bottles upright in a tray so they are easy to count and check at the end of a lesson.

Manufacturer

The Dropper Bottle, 10 ml is manufactured by **Jain Scientific Equipments Private Limited**, known to customers as **ScienceLab**. The company is based in Ambala, Haryana, India, and makes plasticware, glassware and apparatus for teaching laboratories. More is available on our company profile.
