Description :

Microburner (Product Code: SLE/CH/150) is a pack of 20 spare micro burners for the MicroScience system, used to replace burners that go missing, wear out or get damaged in student microscale kits. In microscale chemistry each student or pair heats only tiny quantities of chemicals, so a small burner gives all the heat the practical needs while keeping flames and chemical use to a minimum. Keeping a pack of spares on the shelf means every kit is complete at the start of a lesson, which matters when a whole class is working at once. The pack is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, as part of its range of chemistry consumables for schools in India and abroad.

Specifications

Parameter	Detail
Pack size	Pack of 20
Type	Spare micro burners
For use with	MicroScience system

Typical Use

Microscale kits are popular because they work as a portable science kit for students: each set is compact and easy to carry between rooms, but small parts such as burners are easy to mislay or wear out. A good routine is to check every kit at the end of term, replace any missing or damaged burner from the spare pack, and note how many spares remain so the next order can be placed in good time. Buying spares as a pack of 20 saves reordering individual pieces.

In use, stand the burner on a stable, heat-resistant surface, keep hair, sleeves and paper well away, and follow the MicroScience instructions for fuelling, lighting and putting out the flame. Never refuel a burner while it is lit or still hot, and let each one cool before returning it to its kit. Store spares with the kits they serve so that a replacement is always to hand at the bench.

Supplier

Spare parts like these are supplied by ScienceLab, the trading name of Jain Scientific Equipments Private Limited in Ambala, Haryana, which also lists student microscience kits and comboplates in its chemistry range. Institutional buyers who need vendor details for purchase orders can use GSTIN 06AAECJ8618A1ZT and LEI 3358004HRD1JIVXKYX49. The company serves schools and colleges in India and international markets; see our company profile.

Related Chemistry Lab Equipment

These microscience items are used in the same microscale practicals as the burners.

- Basic Microscience Kit, Student — a student kit for introductory microscale practicals.
- Advanced Microscience Kit, Student — the extended student kit for further practicals.
- Comboplate, Microscience — the multi-well plate used for many microscale reactions.
