Product Name :

The Ultimate Periodic Table Poster

Product Code :

SLE/CH/169

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

The Ultimate Periodic Table Poster (Product Code: SLE/CH/169) is an oversized, colour coded laminated wall chart that gives students a super-sized look at the elements, pairing the familiar atomic symbol and weight with the story of where each element comes from and what it does. Chemistry teachers hang it as the main reference point in a classroom or laboratory, and it serves as a periodic table chart for schools in India that want students to read more than a bare grid of symbols. Part of our chemistry lab equipment in India, it is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala.

Specifications

Parameter	Detail
Type	Oversized, colour coded periodic table wall chart
Finish	Laminated
Dimension	95cm x 139cm
Data for each element	Standard information such as atomic symbol and weight
Extended element information	Discovery of the element, its characteristics, availability, uses and role in life processes
Composition panels	Composition by element of the human body, the planets in our solar system, a fish, a tree and a cheeseburger

Typical Use

Because the poster is large enough to read from the back of a room, it suits whole-class teaching: a teacher can point to an element while introducing symbols and atomic weights, then send students to the chart to look up values for formula-mass or mole calculations. The extra notes on discovery, availability and uses turn it into a research station, where pairs of students pick an element and summarise how it was found and why it matters in industry or in living things.

The composition panels are a natural bridge to other subjects. Comparing the elements in the human body with those in a fish, a tree or the planets gives biology and earth science lessons a chemistry angle, and the cheeseburger panel is a memorable hook for food chemistry discussions. As part of a wider set of school chemistry lab equipment in India, the laminated surface stands up to daily handling; wipe it with a soft, slightly damp cloth and mount it flat at eye level so the lower rows stay easy to read.

Manufacturer

ScienceLab is the trading name of Jain Scientific Equipments Private Limited, a company based in Ambala, Haryana, that produces teaching aids and laboratory apparatus for schools, colleges and training institutes. Wall charts such as this one are supplied alongside the practical equipment used in the same lessons, so a department can equip a room from one source. Read more on our company profile.
