Product Name :

Handle Skin Grafting Eschman Type

Product Code :

SLE/BL/38

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Handle Skin Grafting Eschman Type (Product Code: SLE/BL/38) is an Eschman-pattern stainless steel handle for a skin grafting instrument, used for cutting split-thickness skin grafts in surgical practice and for teaching instrument recognition in theatre and surgical nursing courses. Institutions that list handles by pattern name order it to match their sets, and our product details describe its steel as corrosion proof and highly reliable for medical application. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Key Details

Parameter	Detail
Type	Skin grafting handle
Pattern	Eschman type
Material	Corrosion-resistant surgical stainless steel
Property	Corrosion proof
Intended application	Medical application
Blades and dimensions	Not stated — please confirm at enquiry
Finish	Passivated
Sterility	Supplied non-sterile
Use	Reusable, with cleaning/steam-reprocessing instructions
Product code	SLE/BL/38
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Eschman Skin Grafting Handle Used For?

Operating-theatre and surgical nursing courses teach students to recognise instruments by pattern name, because a theatre list may call for a particular handle rather than just "a grafting knife". Having an Eschman-type handle in the teaching set lets trainees see and hold that pattern, practise laying it out on a tray in the correct order and learn how it is passed safely to the operator. A skin section model then shows where the graft is taken from and how thin it is compared with the full skin layers.

For clinical units, the handle is described for medical application; teams should check blade fit and reprocessing steps against their own theatre protocols before first use. Rinse off tissue and fluids promptly, clean, dry fully and inspect the handle before it goes back into the set.

Manufacturer

ScienceLab is the trading name of Jain Scientific Equipments Private Limited, Ambala, Haryana, India, which manufactures this Eschman-type handle alongside the small grafting handle, stainl
