Description :

Hinged Gable Lid to Suit 2 & 4 Litre Unstirred Baths (Product Code: SLE/WB/12) is a see-through, peaked lid used to cover small unstirred laboratory water baths, cutting evaporation and keeping samples and water clean. Its hinge lets you fold it back to reach the tank without lifting it off, and its high profile leaves the full tank usable right into the edges. This water bath accessory for labs in India is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Key Details

Parameter	Detail
Fits	2 litre and 4 litre unstirred baths
Lid style	Hinged gable (peaked), high profile
Visibility	Semi-transparent, clear lid for watching processes in the bath
Access	Can be hinged back out of the way; removable for cleaning
Handling	Light and easy to use
Condensate control	No drip points to contaminate work in the bath
Purpose	Reduces water evaporation, helps keep samples and water freefrom contamination, saves energy
Product code	SLE/WB/12
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Hinged Gable Lid Used For?

An open water bath loses heat and water continuously, especially at higher settings, so the level drops and the heater works harder. Covering a small 2 or 4 litre unstirred bath with this gable lid slows evaporation, keeps dust and splashes out of the water and the sample tubes, and helps the bath hold its set temperature with less energy. The peaked shape means condensation runs down the sloping sides instead of dripping onto open tubes, since the lid has no drip points.

Because the lid is semi-transparent, students and technicians can watch tubes, flasks or incubations without opening it. Hinge it back when loading or removing samples, and lift it off completely for washing. It is a small, useful addition to any biology, chemistry or microbiology bench that runs a compact digital or analogue water bath in India.

What to Specify When Ordering

- The make, model and capacity (2 litre or 4 litre) of the unstirred bath the lid must fit.
- The number of lids, usually one per bath.
- Whether you also need a bath, sphere blanket or thermometer on the same order.
