Description :

Disposable Lab Pack (Product Code: SLE/M/79) is a pack of single-use laboratory items listedin the ScienceLab microscope range, used where practical sessions call for materials that are discarded after one use rather than washed and reused. Its exact contents and pack size are confirmed with each quotation, so buyers can check them against their practical list before ordering. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, a lab consumables supplier to institutions in India and abroad.

Contents	Confirmed with your quotation
Pack size	Confirmed with your quotation
Product code	SLE/M/79
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Disposable Lab Pack Used For?

Disposable materials save time in busy laboratories: nothing has to be collected, washed, dried and checked between groups, and each student or batch starts with clean items. That matters most in large classes, practical examinations, outreach camps and any session where samples from one group should not carry over to the next. A ready pack also simplifies stock control, because the same unit can be reordered each term.

Because single-use items are designed to be discarded, do not wash and reuse them. After the session, separate waste as your laboratory rules require: glass and sharp items into a puncture-resistant container, and anything that has touched live cultures or biological samples into the appropriate biological waste stream.

Supplier

Jain Scientific Equipments Private Limited, which trades as ScienceLab from Ambala, Haryana, supplies this disposable pack together with slides, cover glasses and other consumables for microscopy practicals. Schools, colleges, teaching laboratories, dealers and importers in India and international markets can combine it with reusable equipment on one quotation. Learn more on the ScienceLab profile page.
