Description :

Weighing Tray (Product Code: SLE/LI/31) is a square high-impact polystyrene tray used to hold powders, granules and small solid samples while they are weighed on a laboratory balance. Chemistry, biology and pharmacy labs use such trays for routine weighing; this one comes in packs of 250, and its 140 × 140 mm size leaves room for larger portions without spilling. These trays are supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Material	High-impact polystyrene
Dimensions	140 × 140 mm
Pack size	250 trays
Product code	SLE/LI/31
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is a Weighing Tray Used For?

Placing a sample straight onto a balance pan contaminates the pan and makes it hard to transfer every particle afterwards. A weighing tray solves both problems: set it on the pan, press tare, add the solid with a spatula, then carry the tray to the beaker or flask and pour. Using a fresh tray for each chemical keeps samples from mixing, which matters when a class of students weighs out different reagents on shared balances.

Pair it with a digital weighing balance whose pan and capacity comfortably take a 140 mm tray, and keep the tray level while adding material so nothing slides off. Polystyrene is attacked by solvents such as acetone, so weigh solvent-wet or hot material in a glass or porcelain dish instead. Store unused trays in their pack to keep them clean and dust-free.

What to Specify When Ordering

- The number of packs of 250 you need for the term or year.
- The balances they will be used on, so we can check the 140 × 140 mm size suits the pans.
- Any other weighing accessories, such as spatulas, to include in the same order.

Supplier

Jain Scientific Equipments Private Limited supplies these weighing trays under its ScienceLab trading name from Ambala, Haryana. As a lab consumables supplier in India, the company sources them for schools, colleges, pharmacy and research laboratories and dealers, and ships to India and international markets alongside balances and other bench items. Read about the company on the ScienceLab profile page.
