Description :

Brush, Beaker, Nylon (Product Code: SLE/GBO/15) is a large-headed cleaning brush for beakers, with nylon bristles on a 40 cm long wooden handle. The 65 x 45 x 150 mm head covers a wide area of the beaker wall and base with each stroke, and the long handle keeps hands clear of dirty water and detergent in the sink. It comes in packs of 10 and is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a chemistry consumables supplier in India for schools, colleges and laboratories.

Specifications

Parameter	Detail
Bristle material	Nylon
Handle	Wooden, 40 cm long
Head size	65 x 45 x 150 mm
Use	Cleaning beakers
Pack	Pack of 10

Typical Use

Beakers collect some of the most stubborn residues in a teaching lab: crusts left after evaporating a solution, precipitates from salt reactions, and dye or stain films from biology practicals. With its broad head, this brush scrubs these deposits off the flat base and straight walls quickly, so a class set of beakers can be cleaned in one wash-up session. Because the head measures 65 x 45 x 150 mm, it suits medium and large beakers; compare it with the internal diameter of your smallest beakers, and use a smaller brush where it will not enter comfortably.

Soak dried residues in warm detergent solution first, then scrub, rinse with tap water and finish with distilled water. Avoid abrasive powders, which can dull glass and scratch plastic beakers. After use, rinse the brush, shake it out and hang it head-down so water drains away from the wooden handle; do not leave it standing in water. A pack of 10 allows one brush per sink or bench group, which is useful when schools replace a full beaker set for school practicals in India at the start of term.

Supplier

Jain Scientific Equipments Private Limited sells this brush under its ScienceLab name from Ambala, Haryana, as a cleaning accessory for the beakers and other glassware it provides to laboratories in India and international markets. Company information is available on the ScienceLab profile page.
