Description :

Human Brain Model, 4 Parts (Product Code: SLE/BL/43) is a life-size, medially divided brain model used to introduce the major regions of the brain in school biology and first-year anatomy teaching. Its right half separates further into the frontal with parietal lobes, the temporal and occipital lobes and the brain stem, and it is colored, numbered and supplied on a base with a key card. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM anatomical models manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Scale	Life-size
Number of parts	4
Division	Medially divided; right half further divided
Regions shown	Frontal with parietal lobes; brain stem; temporal and occipital lobes
Finish	Appropriately colored and numbered
Identification	Key card
Mounting	On a base
Product code	SLE/BL/43
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the 4 Part Brain Model Used For?

With only four parts, this model is quick to take apart and reassemble, which suits younger learners and short revision activities. Students first look at the whole brain from the outside, then separate the halves to see the medial surface, and finally lift away the lobes and brain stem of the right half to relate each region to its broad function — planning and movement towards the front, body sensation towards the top, hearing at the side and vision at the back. Being life-size, it also gives a true sense of how large the organ is.

Teachers of class 10 to class 12 biology often keep it on the demonstration bench as one of their core biology teaching aids, using the numbered key card for identification quizzes. Reassemble the parts after each lesson so pieces are not mislaid, and keep the model on its base, away from direct sunlight.

OEM Manufacturer

Jain Scientific Equipments Private Limited — the company behind the ScienceLab name — is the OEM (original equipment manufacturer) of the Human Brain Model, 4 Parts. The model is produced at the company's own licensed factory at Saha, Ambala, Haryana, India, and reaches schoo
