Description :

Disposable Polythene Apron (Product Code: SLE/SLC/12) is a single-use white polytheneapron that protects clothing from splashes, stains and contamination during practical work, and isthen thrown away instead of being laundered. It suits school and college chemistry and biologylabs, clinical teaching rooms, food practicals and visitor areas, and is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a laboratory equipment supplier in India.

Specifications

Parameter	Detail
Material	Polythene (polyethylene)
Colour	White
Type	Disposable, single use
Fastening	Halter neck and waist ties
Pack size	Pack of 100 aprons
Supplied as	Flat packed

Typical Use

Hand one apron to each student at the start of a wet practical, such as dilutions, staining, dissections or titrations, and collect used aprons in a waste bin at the end so nothing contaminated leaves the room. The halter neck loops over the head and the waist ties are knotted behind, so the apron can be put on over everyday clothing in a few seconds. Because each apron is used once, there is no washing schedule to manage and no risk of passing residues from one class to the next.

A key part of infection control is how the aprons are stored before use: keep the flat packs closed in a clean, dry cupboard so the aprons do not gather dust, which can become a breeding ground for bacteria. For departments stocking school chemistry lab equipment in India, a pack of 100 covers several class sessions and sits neatly on a shelf.

Supplier

ScienceLab is the trading name of Jain Scientific Equipments Private Limited, an Ambala, Haryana company that supplies protective wear and consumables alongside the laboratory apparatus it makes for teaching institutions. These aprons are supplied items; details about the company are on our company profile.

Related Laboratory Equipment

Complete the personal protection kit for your practical classes with these items:

- Gloves W/o Powder Nitrile Disposable — single-use hand protection to pair with the apron.
- Safety Goggles — eye protection for splash-prone work.
