Product Name :

Dropper Bottle, Clear

Product Code :

SLE/GBO/19

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Dropper Bottle, Clear (Product Code: SLE/GBO/19) is a borosilicate glass pipette droppingbottle in clear glass, packed six to a pack, with a glass dropper set in a dust-proof high densitypolythene stopper and topped with a vinyl teat. Clear glass lets students watch the reagent leveland colour, which matters when the appearance of a solution tells you whether it is still usable. Itis made in Ambala by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, a lab glasswaremanufacturer in India serving schools, colleges and testing laboratories.

Specifications

Parameter	Detail
Type	Pipette dropping bottle
Material	Borosilicate glass
Colour	Clear
Dropper	Glass dropper with vinyl teat
Stopper	High density polythene with dust-proof head
Acid and alkali resistance	Stopper and teat both resistant to acids and alkalis
Heat resistance	Heat resistant
Chemical resistance	Chemical resistant
Pack	Pack of 6

Typical Use

In qualitative analysis, reagents are added one drop at a time and the result is read from a colour change or a precipitate, so a bottle that shows its own contents clearly is a real help. A school salt analysis kit typically includes a row of such bottles for dilute acids, ammonia solution and group reagents, each placed within reach of the student. The same bottles serve microscale chemistry on spot plates, where a few drops replace test-tube quantities, and biology practicals where water or mounting fluid is added to slides.

Label every bottle, as clear solutions such as dilute acids and water look identical. Keep one pipette per bottle and never swap them, since cross-contamination can ruin a set of test results. If a solution turns cloudy or changes colour in storage, empty and clean the bottle before refilling with a fresh batch. Remove the stopper assembly before washing the glass in hot water.

Manufacturer

Jain Scientific Equipments Private Limited produces these bottles under its ScienceLab brand at Ambala, Haryana. The company provides laboratory glassware and teaching equipment for institutions in India and international markets, and its background is described on the profile page.
