Description :

Flask, Conical, Wide Neck (Product Code: SLE/GFL/17) is a clear 250 ml Erlenmeyer flask in borosilicate glass with a wide neck and white graduations, made to Class B. The sloping conical sides let contents be swirled without spilling, and the broader mouth speeds up filling, pouringand cleaning. It is a versatile conical flask, part of our borosilicate laboratory glassware in India,for school, college and testing laboratories, manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala.

Specifications

Parameter	Detail
Type	Conical (Erlenmeyer) flask, wide neck
Material	Borosilicate glass
Colour	Clear
Capacity	250 ml
Graduations	White
Class	Class B
Resistance	Heat resistant and chemical resistant

Typical Use

In titration practicals the wide neck makes it easy to position the flask under a burette tip and to rinse the walls down with a wash bottle as the end point approaches, while the conical shape lets students swirl vigorously without losing liquid. The same flask is used for dissolving solids — powders pour straight in through the broad mouth — for warming solutions on a hot plate with magnetic stirring, and for collecting filtrate beneath a funnel.

The clear glass gives an unobstructed view of colour changes, and the white graduations stand out against most coloured solutions for a quick volume estimate. Heat it gradually, avoid setting a hot flask on a cold or wet surface, and clean it with a brush and laboratory detergent — the wide neck lets the brush reach the base easily.

Manufacturer

ScienceLab is the brand of **Jain Scientific Equipments Private Limited**, a manufacturer of laboratory glassware and teaching apparatus in Ambala, Haryana, supplying customers in India and international markets. Our company profile has more information.
