Description :

Hazard Warning Tape: Biohazard (Product Code: SLE/CH/210) is a self-adhesive vinyl labelling tape printed with the biohazard warning pictogram, used to mark containers, shelves, cupboards, bins and equipment that hold biological material. The white tape is hard wearing, 25 mm wide and supplied as a 66 m roll, so one roll labels a large number of items. Microbiology, biotechnology and clinical teaching labs use it alongside other microbiology lab equipment in India, and it is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala.

Specifications

Parameter	Detail
Warning symbol	Biohazard pictogram
Material	Hard wearing, self-adhesive vinyl
Tape colour	White
Print layout	Pictogram repeated every 75 mm, with a blank area between symbols
Width	25 mm
Roll length	66 m

Typical Use

Cut a length of tape covering one or two symbols and apply it to the lid and side of a culture waste container, the door of an incubator or a refrigerator holding cultures, or the edge of a shelf reserved for contaminated items. Because the pictogram repeats every 75 mm with a blank gap in between, the tape can be cut in the gap without slicing through a symbol, and each piece carries a complete warning. The white background keeps the symbol easy to see on dark or metal surfaces.

Apply the tape to clean, dry, grease-free surfaces and smooth it down from one end to avoid trapped air. Consistent biohazard labelling is part of good lab waste disposal practice: students and cleaning staff can recognise at a glance which containers must go for decontamination rather than into general waste. Replace labels that become worn, and remove old tape when a container is taken out of biohazard service.

Supplier

This tape is supplied by Jain Scientific Equipments Private Limited, the incorporated company behind the ScienceLab name, based in Ambala, Haryana. For vendor registration, its details are CIN U29309HR2020PTC087597 and GSTIN 06AAECJ8618A1ZT. See our company profile for more.
