Product Name :

Endraflex Tubing Clamp Collar

Product Code :

SLE/P/37

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Endraflex Tubing Clamp Collar (Product Code: SLE/P/37) is a clamp collar used to seal off Enduraflex tubing evenly when the tube is clamped in laboratory set-ups. Enduraflex tubing is square, so a clamp pressed straight onto it does not close it properly; the purpose-built collar gives the clamp a circular surface so the pressure is shared equally. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a lab plasticware supplier in India, for teaching and research labs.

Key Details

Parameter	Detail
Purpose	Purpose-built clamp collar for Enduraflex tubing
Problem it solves	Square tubing does not seal properly when clamped directly
How it works	Provides a circular surface so the clamp applies equal pressure
Product code	SLE/P/37
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Tubing Clamp Collar Used For?

Flexible tubing in a lab set-up is often closed with a screw clip or pinch clip to stop or control the flow of water, gas or solution. Round tubing flattens neatly under a clip, but square-section tubing such as Enduraflex tends to leave gaps at the corners, so liquid or gas can still leak past. Fitting this collar around the tubing gives the clip a round surface to press on, so the tube closes evenly.

Fit the collar on the tubing where you want to shut it off, position the clamp over the collar and tighten gradually until the flow stops. Check the joint for drips before leaving the apparatus unattended. The collar is a small accessory, but for labs that use Enduraflex tubing it lets a standard clip close the tube as intended in set-ups such as gas collection or water supply lines.

Supplier

The Endraflex Tubing Clamp Collar is supplied by Jain Scientific Equipments Private Limited, which trades as ScienceLab from Ambala, Haryana. We source this accessory for customers who already use Enduraflex tubing, and it can be quoted together with clips, tubing and other lab plastic ware so that a laboratory receives one consolidated order. See the ScienceLab profile for more about the company.

Related Scientific Lab Plasticware

Clips and tubing used in the same set-ups:

- Hoffman Screw Clip — an adjustable screw clip for controlling flow through tubing.
- Pinch Clip — a quick spring clip for closing flexible tubing.
- Rubber Tubing — round flexible tubing for general lab connections.
