Description :

Laboratory Trolley – 4 Shelf (Product Code: SLE/HF/27) is the tallest trolley in this polymer series: four 680 x 450 mm trays spaced 170 mm apart within an overall height of 1080 mm, giving plenty of level space for many small, low items at once. It is used in research, medical, industrial and education labs to move sample racks, boxed consumables, bottles and small instruments. Itis made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a laboratory equipment exporter from India that supplies teaching and testing laboratories at home and abroad.

Specifications

Parameter	Detail
Shelves	4
Tray size	L 680 x W 450 mm
Height between trays	170 mm
Overall dimensions	L 850 x W 480 x H 1080 mm
Construction	Nylon-fibre-blended polymers, chemical resistant, made to withstand harsh working conditions
Frame	Aluminium, 185 mm (as listed)
Colour	Black
Castors	Precision bearing castors, including 2 with brakes
Safe working load	250 kg
Design	Ergonomic, extremely lightweight
Assembly	Rubber construction mallet included for easy assembly

Typical Use

Four close-set trays suit workflows with lots of small, flat loads: a microbiology lab can separate fresh media, inoculated plates and used material onto different tiers, and a clinical or QC lab can sort sample racks by batch or by instrument. Keeping categories on separate trays reduces mix-ups when the trolley is shared between several people.

Many labs also use it as a mobile alternative to a fixed lab storage cabinet in India’s crowded teaching labs, parking it by a bench during a session and wheeling it away afterwards. With only 170 mm between trays, reserve the top tray for taller items, keep heavy loads low, respect the 250 kg working load, and apply the two brakes before loading.

Manufacturer

This four-shelf model is offered by Jain Scientific Equipments Private Limited under its trading name ScienceLab, from Ambala in Haryana. Our company profile describes the business and its labor
