Description :

Mass, Cast Alloy, 100g (Product Code: SLE/LB/33) is a small format cast alloy mass and hanger set used to load light springs, levers and force meters in 10g steps during school physics practicals. It pairs a 10g hanger with nine 10g slotted masses for a 100g total, which makes it easy to issue identical sets to every bench group. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Type	Small format cast alloy mass and hanger set
Material	Cast alloy
Total mass	100g
Contents	9 x 10g slotted masses, 1 x 10g hanger
Product code	SLE/LB/33
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the 100g Cast Alloy Mass Set Used For?

In a typical class practical, each group hooks the 10g hanger onto a light spring, measures the new length, then adds one 10g mass at a time up to 100g before plotting extension against load. The same set serves for balancing a metre rule about its centre, for showing how a force meter reading rises in equal steps, and for simple demonstrations of gravity and weight with younger pupils.

Label each set with a group number so the pieces stay together across lessons, and ask students to hang the set only on springs meant for light loads. A dry wipe after use and storage on the hanger or in a small box keep the cast alloy masses tidy and ready for the next physics lab class.

What to Specify When Ordering

- Material: cast alloy, or the brass 100g set with the same 10g hanger and nine 10g masses.
- Step size: 10g steps with this set, or the [Mass, Cast Alloy, 1000g](#) for 100g steps.
- The number of sets (typically one per bench group) and the delivery location.

OEM Manufacturer

Every Mass, Cast Alloy, 100g set is produced by Jain Scientific Equipments Private Limited — the OEM (original equipment manufacturer) behind the ScienceLab name — at its own licensed factory at Saha, Ambala, Haryana, India. Ordering from the maker rather than a trader means schools, colleges, dealers and importers receive one factory quotation for whole-class quantities, and matching sets for later years can be requested from the same source; just ask us.
