Product Name :

Pestle & Mortar, Unglazed

Product Code :

SLE/CH/216

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Pestle & Mortar, Unglazed (Product Code: SLE/CH/216) is a white porcelain grinding set usedto crush crystals and lumps into a fine, even powder in school and college laboratories. Itsgrinding surface is left unglazed, giving the slight roughness needed for efficient grinding, and the porcelain is chemical resistant, so it can be used with a wide range of laboratory solids. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, as part of its school chemistry lab equipment in India.

Specifications

Parameter	Detail
Material	Porcelain
Colour	White
Grinding surface	Unglazed
Chemical resistance	Chemical resistant
Application	Laboratory grinding and mixing of solids
Product code	SLE/CH/216
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is an Unglazed Pestle and Mortar Used For?

In school chemistry, students crush salt crystals before dissolving them or heating them in a dry test tube, a routine step in salt analysis practicals. College labs use it to powder samples for melting-point work and to blend solids before a reaction, pharmacy students grind tablets and mix powders during dosage-form practicals, and biology classes grind leaves with a little sand and solvent to extract plant pigments. That breadth is why it appears on almost every lab equipment list for school chemistry in India.

Work with small portions: press and rotate the pestle against the bowl rather than pounding, and scrape the powder back to the centre now and then. Because an unglazed surface can hold traces of earlier samples, rinse and brush it straight after use; grinding a little clean sand before washing helps lift stubborn residue. Many labs keep separate sets for coloured or toxic materials to avoid cross-contamination.

Supplier

This pestle and mortar is supplied by **Jain Scientific Equipments Private Limited**, which trades as **ScienceLab** from Ambala, Haryana, India, to schools, colleges and distributors. For vendor registration, the supplying company is Jain Scientific Equipments Private Limited (GSTIN 06AAECJ8618A1ZT, LEI 3358004HRD1JIVXKYX49). More about the company is on the ScienceLab profile page.
