Description :

Beakers (Product Code: SLE/P/01) are basic transparent polypropylene beakers used to hold, mix and pour liquids in school, college and clinical laboratories. Lab staff choose them where glass breakage is a worry, and they carry raised graduations and a tapered spout in capacities from 50 to 2000 ml. They are supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a lab plasticware supplier in India for single sizes or a full beaker set for school labs.

Specifications

Parameter	Detail
Material	PP (polypropylene)
Colour	Transparent
Capacity range	50 to 2000 ml
Graduations	Raised
Spout	Tapered
Chemical resistance	Very good (as listed)
Sterilisation	Autoclavable
Product code	SLE/P/01
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Are Polypropylene Beakers Used For?

These beakers handle the everyday bench jobs that do not need heat: dissolving salts at room temperature, holding samples and rinse water, collecting filtrate, and carrying solutions between benches. The raised graduations give a quick volume check without printed marks that wear off, and the tapered spout gives a controlled pour into a funnel or flask. Because they are autoclavable, microbiology and clinical labs also use them for media handling and for sterilising before reuse.

Beaker graduations are for approximate volumes, so use a measuring cylinder or volumetric glassware when accuracy matters. Do not place polypropylene beakers over a flame or on a hot plate; a borosilicate glass beaker is the right choice for heating. For strong oxidising acids or aromatic and chlorinated solvents, check compatibility before long contact.

What to Specify When Ordering

- The capacities you need within the 50 to 2000 ml range.
- The quantity of each capacity, for example per bench or per lab.
- Whether you also need the tall-form Beakers with Handle for larger volumes.
- The delivery location, in India or abroad.
