Description :

Safety Goggles (Product Code: SLE/LI/38) are polycarbonate protective eyewear worn to help protect the eyes during practical work in school, college and general laboratories. An adjustable strap lets one design fit different wearers across a class, and the goggles are meant forlaboratory use, not for medical use. They are supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, for institutions buying safety goggles for school labs in India.

Key Details

Parameter	Detail
Material	Polycarbonate
Strap	Adjustable
Intended use	Laboratory eye protection — not for medical use
Product code	SLE/LI/38
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Are Safety Goggles Used For?

Goggles belong on every face whenever a practical involves heating liquids, pouring acids or alkalis, crushing solids or working near glassware that could crack. Because they enclose the eye area more fully than ordinary spectacles, many schools make them compulsory for chemistry sessions, and they are among the first items on any list of school chemistry lab equipment in India.

Adjust the strap so the goggles sit snugly before the practical starts, put them on before any reagent bottle is opened, and keep them on until the whole bench has finished and cleared up. After class, wash them in mild soapy water, dry them with a soft cloth and store them in a closed box so the polycarbonate does not pick up scratches.

Supplier

ScienceLab is the trading name of Jain Scientific Equipments Private Limited, which supplies these polycarbonate goggles from Ambala, Haryana, together with other lab safety items and apparatus. Schools setting up or restocking a laboratory can order goggles in class quantities with the rest of their equipment list. Learn more on our company profile.

Related Laboratory Instruments

Other protective items that are worn or set up alongside safety goggles:

- Premium Safety Spectacles — spectacle-style alternative eyewear for the lab.
- Safety Screen — clear bench shield placed in front of demonstrations.
- Lab Coat — body protection worn together with goggles.
- Transparent Plastic Laboratory Apron — splash protection for practical work.
- Eye Wash Station — emergency eye rinsing point for the laboratory.
