Product Name :

Safety Screen

Product Code :

SLE/LI/39

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Safety Screen (Product Code: SLE/LI/39) is a transparent polycarbonate shield used to put a clear barrier between a demonstration and the people watching it in school and college laboratories. A 300 mm central panel is hinged to two 225 mm side panels, all 4 mm thick and610 mm high, so the screen can be angled around the apparatus. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM scientific instruments manufacturer in India, at its own factory in Ambala, as part of its school chemistry lab equipment.

Specifications

Parameter	Detail
Material	Transparent polycarbonate
Construction	Central panel and two side panels connected with hinges
Section widths	225 mm, 300 mm and 225 mm
Panel thickness	4 mm
Overall height	610 mm
Product code	SLE/LI/39
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is a Safety Screen Used For?

A bench safety screen stands in front of demonstrations that might spit, splash or crack glassware — reactive metals in water, vigorous exothermic reactions, or apparatus being heated or run under reduced pressure. The clear polycarbonate lets a whole class follow each stage while the panels sit between the apparatus and the audience.

Face the central panel towards the observers and fold the hinged side panels back to close off the sides. The screen adds to goggles and a fume cupboard; it never replaces them. For cleaning, use mild soap and water only, because solvents such as acetone can craze polycarbonate. It is a sensible addition to chemistry lab equipment for schools in India where teachers demonstrate reactions to full classes.

OEM Manufacturer

The Safety Screen is produced by Jain Scientific Equipments Private Limited, which trades as ScienceLab and is the original equipment manufacturer (OEM) of this item. It is made at the company's own licensed factory at Saha, Ambala, Haryana, India, rather than bought in from a trader, and is supplied factory-direct to schools, colleges, institutions, dealers and importers.

Because the maker handles enquiries itself, questions about replacement panels or repeat orders for more demonstration benches go straight to the manufacturer — just ask us. Read more on our comp
