Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Sanitization Spray Used For?

Shared devices and controls are handled by many people in a day: lab instrument keypads, smartboard and tablet screens, lift and door buttons, photocopier panels and the fronts of kitchen appliances. This spray is intended for exactly those touch points. Because it is perfume free and non-tainting, it also suits staff rooms, canteens and food-preparation areas where a scented cleaner would be unwelcome.

For screens and electronics, spray onto a clean cloth rather than directly onto the device, then wipe; follow the label for any contact time. The trigger locks for storage and transport, and the 150 ml bottle is small enough for a desk drawer, lab bench or vehicle glovebox. Always read and follow the safety directions printed on the label.

What to Specify When Ordering

- Number of packs: the spray is supplied in packs of 12 bottles of 150 ml.
- Batch expiry: ask for the expiry date of the batch in your quotation.
- Safety information: request the label and safety data you need for your site records.
- Companion items: add hand sanitiser or cleaning kits if you are equipping classrooms or
