Product Name :

Human Brain Model, 8 Parts

Product Code :

SLE/BL/46

Description :

Human Brain Model, 8 Parts (Product Code: SLE/BL/46) is a medially divided anatomical brain model used to teach the lobes, brain stem and cerebellum as biology lab equipment in Indian and overseas schools and colleges. Its parts show the frontal with parietal lobes, the temporal with occipital lobes, half of the brain stem and half of the cerebellum, coloured and numbered with a key card. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM manufacturer of school biology lab equipment in India, at its own factory in Ambala.

Specifications

Parameter	Detail
Number of parts	8
Division	Medially divided
Regions shown	Frontal with parietal lobes; temporal with occipital lobes; half of brain stem; half of cerebellum
Finish	Appropriately coloured and numbered
Identification	Key card
Base	Removable base
Product code	SLE/BL/46
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the 8-Part Human Brain Model Used For?

The 8-part division is well matched to a full practical session. Groups begin with the assembled brain, identify the main lobes from the outside, then split the model along the midline to study the medial surface of each half. Removing the half brain stem and half cerebellum shows how these structures sit beneath the cerebrum and why damage at the back of the brain affects balance and coordination.

Lifting the model off its removable base lets students turn it over and look at the underside, which stays hidden on fixed models. Teachers set identification exercises using the numbered structures and key card, rotating the parts between benches so every student handles each region, which makes it a dependable core piece in a human biology model set in India. Count the parts back in at the end of a session and reassemble them on the base for the next class.

OEM Manufacturer

Jain Scientific Equipments Private Limited, which trades as **ScienceLab**, is the OEM (original equipment manufacturer) of the Human Brain Model, 8 Parts. The model is made and assembled at the company's own licensed factory at Saha, Ambala, Haryana, India, rather than bought in from
