Product Name :

Electroscope, Needle

Product Code :

SLE/PHY/168

Description :

The electrostatic demonstrator is great for hands on experience with electrostatic principles in physics classrooms and labs.

Front glass window slides up to allow insertion of ionising material in chamber.

The sheet metal walls of the electrostatic demonstrator are attached to a plastic base and top.

This light weight metal blade deflects when the electrostatic demonstrator plate is charged.

A light-weight metal vane is used as a pointer in the electrostatic demonstrator.

A graduated scale is provided to measure the angle of the deflection.

Contact Science Lab for your Educational School Science Lab Equipments. We are best technical educational equipments manufacturers, technical educational equipments manufacturer, technical educational equipments supplier, technical educational instruments, technical educational instruments exporter, technical educational instruments manufacturer, vocational training lab instruments exporter.
