Product Name :

Solar Minikit Basic

Product Code :

SLE/PHY/214

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Solar Minikit Basic (Product Code: SLE/PHY/214) is a primary school base kit used to runmainly qualitative renewable-energy experiments with the Basics add-on sets. Its hand crankgenerator lets children produce the electricity for each experiment themselves, so no mainsconnection or separate voltage source is needed in the room. This hands-on science kit forprimary school is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, aspart of its school physics lab equipment in India.

Specifications

Parameter	Detail
Kit type	Base kit for the Basic series, elementary (primary) school level
Experiment type	Mainly qualitative experiments with the Basics add-on sets
Energy source	Hand crank generator; no extra electrical connection or voltage source needed
Base	Base unit small
Connections	2 x short-circuit plug for linking modules; test leads 50 cm, one black and one red
Packing	Carton with Minikit Basic insert
Documentation	Layout diagram Minikit Basic; info sheet for initial startup
Product code	SLE/PHY/214
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

Components in the Solar Minikit Basic:

- 1 x Hand generator
- 1 x Base unit small
- 2 x Short-circuit plug
- 1 x Test lead black 50 cm
- 1 x Test lead red 50 cm
- 1 x Insert Minikit Basic
- 1 x Carton
- 1 x Layout diagram Minikit Basic
- 1 x Info sheet for initial startup

What Is the Solar Minikit Basic Used For?

The Solar Minikit Basic is used to give young learners their first experience of making and using electricity. Children place the modules of an add-on set on the small base unit, bridge them with the short-circuit plugs or leads, and then turn the hand generator to make something light up, move or sound. Turning faster or slower gives an immediate, visible link between effort and electrical energy.
