# Description :

The **Human Female Urogenital Model** (Product Code: SLE/BL/55) brings the female urinary and reproductive systems together in a single PVC plastic model measuring 20 x 20 x 50 cm. It shows the kidney, ureters and urinary bladder alongside the uterus and its accessories, the vagina, the ovary membrane and the supporting ligaments, including the uterus ligament and its artery. The model is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, and is used as a combined excretory and reproductive teaching aid in schools, nursing colleges and medical institutions.

## Specifications

| Parameter | Detail |
|---|---|
| Type | Female urogenital system model |
| Material | PVC plastic |
| Size | 20 x 20 x 50 cm |
| Urinary structures | Kidney, ureters, urinary bladder |
| Reproductive structures | Uterus and accessories of the uterus, vagina, ovary membrane |
| Supporting structures | Ligaments, including the uterus ligament and its artery |

## Typical Use

Textbooks usually present the urinary and reproductive systems in separate chapters, yet in the body they lie close together in the pelvis. This model is useful precisely because it shows them in one piece: students can follow urine from the kidney down the ureters to the bladder, and see at the same time how the bladder sits in relation to the uterus and vagina. Tutors also use the ligaments and the uterine artery to explain how the uterus is held in position and supplied with blood.

For nursing and midwifery students, understanding this close relationship is useful background for clinical procedures and for recognising how pregnancy affects the urinary tract. In high school biology lab equipment collections it supports both the excretion and the reproduction chapters with one purchase. At 20 x 20 x 50 cm it needs a clear shelf; clean it with a slightly damp cloth and keep it away from heat sources.

## Manufacturer

ScienceLab is the trading name used by Jain Scientific Equipments Private Limited of Ambala, Haryana, which manufactures this urogenital model among its anatomy and life-science teaching products. Our company profile describes the company in more detail.
