Product Name:

Product Code:

Xenon Stroboscope

SLE/PHY/322

Email: sales@scilabexport.com Phone: +91-7082934803

Description:

The stroboscope is also known as a revolution calibration meter as well as a stroboscopic lamp. It emits an instantaneous intense Xenon flash which can be synchronized with the speed of a target object.

This procedure permits calculation of the speed of an object that has an unknown movement speed or rotational velocity.

It features a rotating encoder to facilitate rapid frequency modulation.

It incorporates a high performance microcontroller as the processing unit and it includes a specific display chip which drives the 7-segment LED to present real-time flashing frequency data.

In practice, the target object will appear to be moving slowly or stationary, however, in reality it is easily photographed using standard digital cameras.

Used in a wide variety of scientific and industrial applications.

Operation is simple and convenient with complete instructions supplied.

Technical Specifications:

Power supply: AC220V± 5%, 1.2A Power supply: AC220V± 5%, 1.2A **Power Consumption:** Maximum power consumption less than 8W **Triggering Frequency Scope:** 0.2~300 Hz (internal & external)

Recommended Triggering Frequency: 0.2~180 Hz

Flash tube intensity: approximately 10000 lux

External Triggering signal Scope: 5~12V pulse signal

Outside dimension (L x W x Ht): 215mm × 140mm × 150mm

Net Weight: 2 Kg

Contact Science Lab for your Educational School Science Lab Equipments. We are best school science lab equipments suppliers in india, school science lab instruments, school science lab instruments exporter, school science lab instruments manufacturer, school scientific equipments, science educational equipment.
