Description :

Human Larynx Model (Product Code: SLE/BL/63) is a full-size, two-part anatomical model of the voice box used to teach the larynx and the muscles, thyroid gland, hyoid bone, windpipe, ligaments, vessels and nerves around it in medical, nursing, speech therapy and school biology classes. Every structure is numbered and identified on a key card, and the model is mounted on a base. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, an OEM anatomical models manufacturer, at its own factory in Ambala, India.

Specifications

Parameter	Detail
Structures shown	Muscles, thyroid gland, larynx, hyoid bone, windpipe (trachea), ligaments, vessels, nerves
Size	Full size
Parts	Divided into 2 parts
Identification	Numbered, with key card
Mounting	Mounted on a base
Finish	Appropriately coloured and nicely finished
Product code	SLE/BL/63
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab) — OEM
Country of origin	India (made in Ambala, Haryana)

What Is the Larynx Model Used For?

Opening the model into its two parts reveals structures that are hidden in the intact neck, so a lecturer can move from the outer muscles and thyroid gland to the larynx itself and the windpipe below it. The numbered key card makes it suitable for self-study and spot tests: students name each numbered structure, then check their answers against the card. Speech and language therapy students relate the cartilages, ligaments and muscles to voice production, while nursing students use it to understand the airway.

In schools, the larynx often joins a respiratory-system display next to lung and nasal cavity models, forming part of a human biology model set for the topic. Keep the key card with the model, reassemble the two halves after each class, and store it covered to prevent dust collecting in the detail.

OEM Manufacturer

ScienceLab is the trading name of Jain Scientific Equipments Private Limited, the OEM (original equipment manufacturer) that makes this larynx model at its own licensed factory at Saha, Ambala, Haryana, India. Because the model is produced by the manufacturer rather than sourced from
