Description :

Microscope Cleaning Kit (Product Code: SLE/M/120) is a set of cleaning tools andconsumables used to remove dust, fingerprints and oil from microscope lenses and optics inschool, college and research laboratories. The kit contains a brush, an air blower, lens fluid, lint-free lens tissue or paper and cotton swabs, covering both dry and wet cleaning. It ismanufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Key Details

Parameter	Detail
Contents	Brush; air blower; lens fluid; lint-free lens tissue/paper; cotton swabs
Cleaning methods	Dry (blower and brush) and wet (lens fluid with tissue or swab)
Lens fluid shelf life	Depends on the fluid, its grade and storage conditions; ask us for the expiry date of the batch you are quoted
Product code	SLE/M/120
Manufacturer	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is a Microscope Cleaning Kit Used For?

Dust on an eyepiece, a thumbprint on an objective or dried immersion oil on the oil lens can make a good microscope look faulty. Regular cleaning keeps images sharp and protects the optics of compound and stereo microscopes in school and college labs, where many hands use the same instruments every week.

Work from dry to wet: first blow loose grit away with the air blower, then sweep with the brush so particles cannot scratch the lens when it is wiped. Next, moisten a lens tissue or cotton swab with a little lens fluid and wipe in a spiral from the centre outward, finishing with a dry tissue. Never pour fluid straight onto a lens, and do not dismantle objectives.

What to Specify When Ordering

- Number of kits, for example one per lab or per group of microscopes
- Extra lens tissue packs as refills
- Immersion oil, if your microscopes have oil immersion objectives

Manufacturer

ScienceLab, the trading name of Jain Scientific Equipments Private Limited, Ambala, Haryana, manufactures this microscope cleaning kit together with microscopes, lens tissue and immersion oil, so a lab can set up a care routine when it buys new instruments. It serves schools, colleges, dealers and importers in India and international markets. See the ScienceLab company profile for more.
