Product Name :

Attachable Mechanical Stage

Product Code :

SLE/M/124

Description :

Attachable Mechanical Stage (Product Code: SLE/M/124) is a microscope accessory used to hold a slide and move it in controlled steps on the stage of a Digital Monocular Microscope in school and college labs. It attaches to the microscope to give students precise slide positioning, and its listed dimensions are 51 x 26 mm. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, a laboratory instruments supplier in India, as an add-on for digital monocular microscopes.

Key Details

Parameter	Detail
Type	Attachable mechanical stage
Use with	Digital Monocular Microscope
Dimensions	51 x 26 mm (as listed)
Product code	SLE/M/124
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is an Attachable Mechanical Stage Used For?

Pushing a slide by hand at high magnification is jerky, and the specimen easily drifts out of view. An attachable mechanical stage holds the slide and moves it with controls, so students can scan a blood smear or trace a root section field by field without losing their place. On a digital monocular microscope, where the class may be watching the image on screen, that steady movement makes demonstrations much easier to follow.

Attach the stage to the microscope, secure the slide in its holder, and use the controls rather than your fingers to move the specimen. Keep the moving parts free of dust and immersion oil, and remove the stage before packing the microscope away if it does not fit the case with the stage in place.

What to Specify When Ordering

- The exact Digital Monocular Microscope model and code it will be fitted to
- Number of stages required
- Whether the microscope itself should be quoted together with the stage

Supplier

Jain Scientific Equipments Private Limited, trading as ScienceLab from Ambala, Haryana, supplies this attachable mechanical stage as an accessory for digital monocular microscopes. Schools, colleges, dealers and importers in India and international markets can order it with the microscope or later as an upgrade. See the ScienceLab company profile for company details.
