Description :

Prepared Microscope Slide Set – Health And Disease (Product Code: SLE/PS/105) is a set of prepared glass microscope slides used to compare healthy and diseased human-body tissue in biology, health science and introductory pathology classes. It covers eight preparations with 2 slides of each, from lymph node and spleen to emphysema, thrombus, lung of smoking and atherosclerosis of the main and coronary arteries. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Lymph node section	2 slides
Spleen section	2 slides
Spleen TS	2 slides
Emphysema	2 slides
Lung of smoking	2 slides
Thrombus	2 slides
Main artery atherosclerosis	2 slides
Coronary artery atherosclerosis	2 slides
Product code	SLE/PS/105
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Prepared Microscope Slide Set – Health And Disease Used For?

The set brings disease topics from the textbook to the microscope. Lymph node and spleen slides show the organs where immune cells gather, giving students a reference for normal lymphoid tissue. The lung slides let them compare emphysema and the lung of a smoker, a strong visual link to lessons on smoking and gas exchange.

The cardiovascular slides cover a thrombus and atherosclerosis in both a main artery and a coronary artery, so a class can see how deposits narrow the vessel and discuss heart disease risk factors. With two copies of each preparation, one slide can stay on the demonstration microscope while the second passes round a small group. These prepared microscope slides also suit revision sessions before practical examinations.

What to Specify When Ordering

- Number of sets, bearing in mind each holds 2 slides per preparation
- Whether normal-tissue sets (such as circulatory or histology slides) should be quoted for
-

Sup
