Description :

Prepared Microscope Slide Set – Digestion (Liver, Pancreas And Tongue) (Product Code: SLE/PS/113) is a set of prepared tissue slides used to examine the accessory digestive organs, the tongue and the oesophagus in biology and anatomy practicals. Its highlight is a transverse section of pancreas showing the islets of Langerhans, alongside liver, tongue taste-bud and oesophagus preparations. The set is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, for biology labs buying prepared microscope slides in India and in international markets.

Key Details

Parameter	Detail
Liver	Liver, section
Pancreas	Pancreas, section; Pancreas showing islets of Langerhans, TS
Mouth and gullet	Tongue showing taste buds, VS; Oesophagus, section
Preparations listed	5
Figure listed against each preparation	10 (the listing does not define it; we confirm slides per preparation when quoting)
Label abbreviations	TS = transverse section; VS = vertical section
Product code	SLE/PS/113
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the Liver, Pancreas and Tongue Slide Set Used For?

This set covers the parts of digestion that happen outside the main tube of the gut. On the liver slide, students look for the repeating lobules and the rows of liver cells around central veins. The two pancreas slides work well side by side: the general section shows the enzyme-producing tissue, and the islets section picks out the pale clusters of hormone-secreting cells, a useful bridge from digestion to blood-sugar control.

The tongue section shows taste buds set into the surface, which ties the practical to the senses, and the oesophagus slide shows the layered lining and muscular wall that move food to the stomach. For zoology and human biology courses, the set works as a compact histology unit and fits neatly beside liver and tongue models on the same bench.

What to Specify When Ordering

- The number of sets for your class or department.
- The number of slides per preparation you require, since the figure 10 in the listing is not defined.
- Whether the companion Digestion set (stomach to colon) should be quoted as well
