Description :

Alcohol Hand Sanitizer, 150ml (Product Code: SLE/SAH/27) is an alcohol-based hand sanitiser spray used to disinfect hands without soap or water in classrooms, laboratories, offices and other shared spaces. Its 80% alcohol, no-rinse formula dries quickly, and the 150 ml bottles come 12 to a pack, a handy size for desks, bags and lab benches. It is supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India, as part of its school and lab consumables range.

Product code	SLE/SAH/27
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Is the 150ml Alcohol Hand Sanitizer Used For?

Teachers and lab staff keep this spray at classroom doors, on practical benches and in staff rooms so that students can clean their hands before and after handling shared apparatus, specimens or books. Spray enough onto the palms to wet both hands, then rub it over the backs of the hands, between the fingers and around the nails until the skin is dry. No towel or rinse is needed, which keeps queues short when a whole class changes rooms.

Alcohol sanitiser is a companion to soap and water, not a replacement: when hands are visibly dirty or greasy, wash them first. Because the formula is alcohol based, let hands dry completely before lighting a Bunsen burner and store bottles away from heat and flames. Stocking small bottles like these is a simple, low-cost part of any school laboratory setup in India.

Supplier

Jain Scientific Equipments Private Limited trades under the name ScienceLab and supplies hygiene products such as this 150 ml sanitiser spray alongside its laboratory equipment, so schools, colleges and distributors can combine both on one purchase order. For vendor registration, the supplying company is listed under CIN U29309HR2020PTC087597 and GSTIN 06AA
