Description :

Sterilising Tablets (Product Code: SLE/SAH/31) are pre-measured sterilising tablets used to prepare a soaking solution that disinfects protective eyewear and reusable equipment in labs, workshops and classrooms. Each tablet is dissolved in 5 litres of water, which removes any need to measure liquid, and a pack holds 28 tablets for storage in a drawer or first-aid cupboard. They are supplied by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, India.

Specifications

Parameter	Detail
Form	Sterilising tablet
Intended use	Protective eyewear and equipment
Preparation	Tablet dissolved in 5 litres of water
Soak time	15 minutes

Working solution	Effective for up to 24 hours
Stated efficacy	Stated to kill 99.9% of germs including bacteria, fungi and viruses; stated effective on Rotavirus, Coronavirus, MRSA, swine flu and more
Quantity	28 tablets
Shelf life	Shelf life depends on the chemical, its grade and storage conditions; ask us for the expiry date of the batch you are quoted.
Product code	SLE/SAH/31
Supplied by	Jain Scientific Equipments Pvt Ltd (ScienceLab), Ambala, India

What Are Sterilising Tablets Used For?

Tablets suit places where measuring a liquid concentrate is inconvenient, for example a workshop store, a field trip kit or a science department without a measuring jug to spare. Drop one tablet into 5 litres of water, allow it to dissolve, immerse the goggles or equipment for 15 minutes, and then set them aside to dry without rinsing.

Because every tablet is the same size, each batch has the same strength regardless of who prepares it, which helps when student helpers or lab assistants take turns. Make a new batch within 24 hours, handle tablets with dry hands, and keep the pack sealed. Stocking a compact pack like this is an easy step for any lab consumables supplier or school purchasing officer in India planning eye-protection hygiene.

Supplier

Sterilising Tablets are supplied by Jain Scientific Equipments Private Limited, which trades as Scien ry equip s AAE[C] file.
