# Description :

**Double Antimicrobial Trolley with Shallow Trays** (Product Code: SLE/HF/36) is a double storage trolley whose surfaces are treated with an antibacterial additive, supplied with sixteen shallow trays for organised, hygienic storage. It is intended for places where cleanliness matters as much as order — school medical rooms, first aid stations, clinics, hospital wards and science departments — and it is just as useful for keeping a school's health education kits sorted. The trolley is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala.

## Specifications

| Parameter | Detail |
|---|---|
| Type | Double antimicrobial storage trolley |
| Surface treatment | Treated with an antibacterial additive |
| Stated protection | Built-in antimicrobial protection against MRSA and E. coli as well as other infections |
| Hygiene benefit | Intended to stop bacteria and viruses spreading on the surfaces, so hygiene does not rely solely on continual cleaning |
| Trays supplied | 16 shallow trays |
| Suitable for | General school storage and hygienic storage of medical, school or first aid equipment |

## Typical Use

In a school medical room or first aid station, the sixteen shallow trays make it simple to separate dressings, plasters, bandages, gloves, cold packs and record forms so the right item is found quickly during an incident. Wards and clinics use the same approach for small consumables that are handled many times a day, where a treated surface adds a layer of protection between cleans. In science departments the trolley works as ordinary tray storage for items such as microscope accessories or biology kits that are shared between classes.

The antibacterial treatment supports good hygiene but does not replace it: keep to your normal cleaning and infection-control routine, wipe spills promptly, and store sterile items in their sealed packaging inside the trays. Ask us which cleaning agents suit the treated surfaces before using strong disinfectants.

## Manufacturer

Jain Scientific Equipments Private Limited, trading as ScienceLab, makes this trolley in Ambala, Haryana, as part of a furniture range that serves hospital, clinic and school settings as well as laboratories. Our company profile gives an overview of the business.
