Product Name :

Double Antimicrobial Trolley with Deep and Shallow Trays

Product Code :

SLE/HF/37

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Double Antimicrobial Trolley with Deep and Shallow Trays (Product Code: SLE/HF/37) combines an antibacterial-treated trolley body with a mixed set of trays: four deep trays for bulkier stock and eight shallow trays for small items. That mix suits a medical room or clinic that keeps boxed supplies and loose consumables side by side, as well as a school department that wants hygienic storage for shared equipment. It is manufactured by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, for schools, hospitals and training institutes looking for practical laboratory furniture in India.

Specifications

Parameter	Detail
Type	Double antimicrobial storage trolley
Trays supplied	4 deep and 8 shallow trays
Surface treatment	Specified antimicrobial finish: surfaces treated with an antibacterial additive, as stated in the product specification
Suitable for	General school storage and safe, hygienic storage of medical, schoolor first aid equipment

Typical Use

The four deep trays take boxed items — packs of gloves, rolls of cotton wool, bottles of saline or larger first aid refills — while the eight shallow trays keep plasters, scissors, thermometers, tapes and record cards visible and easy to count. Nurses and first aiders often label each shallow tray with its contents and a minimum stock level so restocking is quick. In a biology or health-science department the same trolley can hold dissection accessories in the shallow trays and specimen containers in the deep ones.

Treat the antimicrobial surface as an extra safeguard, not a substitute for cleaning. Continue your regular wipe-down schedule, keep sterile products sealed until use, and check with us which disinfectants are suitable for the treated trolley and trays.

Manufacturer

This trolley is made by Jain Scientific Equipments Private Limited, a company in Ambala, Haryana that operates under the ScienceLab name and supplies medical, school and laboratory furniture. Further information is on our company profile.
