Description :

Bench Height Trolley, Double Column (Product Code: SLE/HF/38) is an 850mm high double column trolley on castors that brings tray storage down to working-bench level. Because traysand runners are ordered separately, schools and labs can fit it out with exactly the tray depthstheir equipment needs. Made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, itsuits prep rooms, teaching labs and hospital laboratories that want mobile storage which stands alongside a lab bench rather than towering over it.

Specifications

Parameter	Detail
Type	Bench height trolley, double column
Height	850mm
Width	710mm
Depth	420mm
Mobility	Supplied with castors
Trays and runners	Not included – available separately

Typical Use

At 850mm high, this trolley lines up with bench work rather than acting as tall shelving, so it can be parked at the end of a lab bench school students already use and trays pulled out without reaching up. Technicians often keep it beside the demonstration bench with trays of the day's apparatus, then roll it back to the prep room at the end of the session. The two columns let you run two different tray depths side by side — for example small parts in one column and bulkier items in the other.

When ordering, decide how many trays of each depth you need and order matching runners at the same time. Keep heavier trays low, check the castors roll freely before loading, and store the trolley on a level floor.

Manufacturer

Jain Scientific Equipments Private Limited produces this trolley under its ScienceLab trading name in Ambala, Haryana. The company builds modular trolleys and frames so that institutions can combine storage units with the trays that suit them; visit our company profile to find out more.
