Description :

Bench Height Trolley, Single Column (Product Code: SLE/HF/39) is a compact, 370mm wide single column trolley standing 850mm high on castors. Its slim footprint is made to slip into a narrow gap beside a bench, under a window or next to a fume cupboard while still holding a column of trays. Built by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, it helps schools, colleges and hospital labs squeeze useful mobile storage into a new school lab setup or a crowded existing room.

Specifications

Parameter	Detail
Type	Bench height trolley, single column
Height	850mm
Width	370mm
Depth	420mm
Mobility	Supplied with castors
Trays and runners	Available separately

Typical Use

A single column trolley is often given to one teacher or one subject area as a personal kit store: a column of trays holding demonstration items, a set of meters or a class set of small apparatus that travels with the teacher between rooms. In hospital or pathology labs it can sit next to a workstation carrying the consumables for one procedure. Its narrow 370mm width makes it easy to manoeuvre through doorways and between benches.

Choose trays and runners to suit what the column will hold — several shallow trays for small items or fewer deep trays for taller equipment — and order them with the trolley so it arrives ready to use. Because a narrow trolley has a smaller footprint, keep the heaviest trays lowest and push it gently over thresholds.

Manufacturer

ScienceLab, the trading name of Jain Scientific Equipments Private Limited, manufactures this unit in Ambala, Haryana alongside the double and treble column versions of the same trolley. More about our work is on the company profile.

Related Hospital Furniture

Items that complete or complement a single column trolley:

- Runners for Trolley — runners to carry your trays; we will confirm the right fit.
- Metal Top, Single Frame — a metal top made for single frames; ask whether it suits this trolley.
