Description :

Double Column Frame (Product Code: SLE/HF/41) is a tall steel storage frame, 1850mm high and 710mm wide, that holds two columns of trays for floor-to-shoulder storage in prep rooms, stores and laboratories. Trays and runners are supplied separately, so the frame can be fitted out for whatever mix of small components and bulky apparatus a department keeps. It is produced by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala, for schools, colleges and hospital labs organising a complete lab setup around a modular tray system.

Specifications

Parameter	Detail
Type	Tall double column storage frame
Material	Steel
Dimensions	1850 H x 710 W x 420 D mm
Trays and runners	Supplied separately

Typical Use

A tall frame like this becomes the main tray store of a prep room: trays for each topic or class live in the frame and are lifted out onto a bench or trolley when needed. Placing frequently used trays between waist and shoulder height reduces bending and reaching, while seldom-used stock goes at the top or bottom. The two columns make it easy to separate subjects — for example physics on one side and chemistry on the other — or small-parts trays from deep trays.

Stand the frame on a level floor and load heavier trays in the lower positions so the frame stays stable; where your safety policy requires it, secure tall storage to the wall. Order runners for every tray position you plan to use, and label tray fronts so staff can find kit without opening every tray.

Manufacturer

Jain Scientific Equipments Private Limited trades as ScienceLab and is based in Ambala, Haryana. The company manufactures at its factory in the HSIIDC Industrial Area, Saha, Ambala. Read more on our company profile.

Related Hospital Furniture

Components and alternatives buyers usually consider with this frame:

- Runners for Trolley — runners to carry the trays; confirm the right type for this frame with us.
- Metal Top, Double Frame — a metal top made for double frames.
- Single Column Frame — a single column frame for narrower wall spaces.
- Treble Column Frame — three columns for larger stores.
- Bench Height Trolley, Double Column — a lower, mobile double column unit on castors.
