Product Name :

Metal Top, Treble Frame

Product Code :

SLE/HF/44

Description :

Metal Top, Treble Frame (Product Code: SLE/HF/44) is a flat metal top panel made to sit on a treble frame, turning the open upper end of a tall tray-storage unit into a usable surface. Measuring 1055mm wide by 420mm deep, it is sized for the treble format, so hospitals, clinics, schools and laboratories planning their laboratory furniture in India can finish a treble frame neatly instead of leaving the top exposed. It is produced by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala.

Specifications

Parameter	Detail
Type	Metal top for treble frame
Material	Metal
Width	1055mm
Depth	420mm
Supplied as	Top panel only; the treble frame is a separate item

Typical Use

A tall treble frame holds rows of trays, but its top is simply open framework. Adding this metal top gives staff a flat shelf at the head of the unit for items in current use — a box of gloves in a treatment room, a labelled tray of consumables at a nurses' station, or reference folders beside a school prep-room store. It also gives the finished unit a tidier, furniture-like appearance when it stands in a ward corridor or classroom.

When planning a school lab setup in India or a hospital store room, order one top for every treble frame you intend to close off, and check with us which frame model you have so the top seats correctly. Keep heavy or liquid-filled containers on the lower tray levels rather than on the top, which keeps the unit stable, particularly if the frame is fitted with castors.

Manufacturer

This top panel comes from **Jain Scientific Equipments Private Limited**, the company behind the **ScienceLab** brand, which works from Ambala in Haryana, India, and produces storage furniture alongside laboratory and educational equipment. Background on the company is available on our company profile page.

Related Hospital Furniture

Items usually planned together with a treble frame top:

- Treble Column Frame — the tall steel treble frame that a top of this format is intended to cover
- Castor Set of 4 — metal castors for making a frame mobile
