Product Name :

Single Column Frame

Product Code :

SLE/HF/45

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Single Column Frame (Product Code: SLE/HF/45) is a tall, narrow steel frame that forms the skeleton of a single column of tray storage. You choose the trays and runners separately, which lets a hospital store, pharmacy corner, clinic or school prep room build exactly the tray mix it needs in a slim footprint. As part of our school laboratory furniture in India and ward storage range, it is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala.

Specifications

Parameter	Detail
Type	Single column tall frame
Material	Steel
Dimensions	1850 H x 370 W x 420 D
Trays and runners	Supplied separately

Typical Use

A single column frame suits places where floor space is tight but vertical space is free: the gap beside a treatment couch, the end of a pharmacy counter, or a slot between two cupboards in a science preparation room. Because it is only one column wide (370 W), it can be positionedwhere a double or treble unit would block a doorway, while its 1850 H height still gives many tray levels for dressings, sample tubes, practical kits or stationery.

For a new lab setup in a school in India or a ward refit, plan the tray layout first: decide how many shallow and deep trays each column will hold, then order the matching runners so every tray has a pair to slide on. Keep the heaviest trays near the bottom, and add a metal top or castors if the frame needs a closed top or has to be moved for cleaning.

Manufacturer

Steel tray frames like this one are produced by **Jain Scientific Equipments Private Limited**, trading as **ScienceLab** from Ambala, Haryana. More about the business is on our company profile .

Related Hospital Furniture

To complete a single column storage unit, buyers usually add:

- Runners for Trolley — metal runner pairs for tray positions (confirm fit with this frame when ordering)
- Metal Top, Single Frame — closes the top of a single frame to give a flat surface
- Castor Set of 4 — heavy duty castors to make the frame mobile
- Double Column Frame — a wider frame when two columns of trays are needed
- Treble Column Frame — the widest tall frame for large tray stores
