Product Name :

Castor Set of 4

Product Code :

SLE/HF/47

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Castor Set of 4 (Product Code: SLE/HF/47) is a pack of four heavy duty metal castors for fitting under storage frames and trolleys, so a loaded tray unit can be rolled out for cleaning, moved between rooms or pulled to the bench where it is needed. Each castor is a standard school castor 75mm high. Stocked as one of our lab equipment accessories in India for tray-storage furniture, the set is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala.

Specifications

Parameter	Detail
Type	Heavy duty castor, standard school castor
Material	Metal
Height	75mm
Pack size	Supplied in packs of 4
For use with	Frames and trolleys

Typical Use

Static tray frames are hard to clean behind and awkward to reorganise once full. Fitting a set of four castors — one at each corner — lets housekeeping staff roll a frame away from the wall to clean the floor, lets a laboratory technician wheel a tray unit next to the teaching bench for a practical, and lets a ward move stock closer to where it is used. Because the castors add 75mm to the height of the unit, allow for this when the frame has to fit under a shelf or worktop.

Order one pack per frame or trolley. On busy sites these castors are also kept as lab equipment spare parts in India so that a worn castor can be swapped quickly without taking the storage unit out of service. Check the mounting on your frame with us before ordering replacements for older furniture.

Manufacturer

The castor sets are offered by **Jain Scientific Equipments Private Limited**, known in the market as **ScienceLab** and based in Ambala, Haryana, India, to go with the frames and trolleys in its hospital and laboratory furniture range. Our company profile gives more detail about the company.

Related Hospital Furniture

Frames and parts commonly ordered with castors:

- Single Column Frame — a slim tall frame that can be made mobile
- Double Column Frame — a two-column tall frame for larger tray stores
- Treble Column Frame — the widest tall frame, where mobility helps with cleaning access
- Double Column Trolley — a trolley-format tray unit in the same range
- Runners for Trolley — metal runner pairs for fitting tray levels
