Description :

Hazardous Storage Cabinet Vertical (Product Code: SLE/HF/49) is the compact, single-door member of our hazardous storage range: a vertical steel cabinet of 0.9mm thick sheet with one adjustable shelf and a removable sump, sized at 910 x 457 x 457mm. It is intended for smaller stocks of flammable liquids, chemicals, paints and solvents that still need to be kept apart from everyday supplies — in a ward sluice area, a dental or clinic store, a small diagnostic lab or a school prep room. It is made by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala.

Specifications

Parameter	Detail
Type	Vertical
Material	Steel, 0.9mm thick
No. of doors	1
No. of shelves	1 (adjustable, perforated, galvanised)
Sump	Leak proof, removable, galvanised
Colour	Bright yellow with warning signs
Dimensions (H x W x D)	910 x 457 x 457mm
Designed for	Secure storage of chemicals, paints, solvents and dangerous substances, including flammable liquids

Typical Use

With a square 457 x 457mm footprint, this cabinet fits into a corner or beside a sink unit where a wide horizontal cabinet would not. It is a sensible first hazardous-storage purchase for departments that hold only a few litres of spirit, acetone, xylene or cleaning solvents, and for schools that want flammable reagents out of the general chemistry lab equipment cupboards. The single door keeps opening space small in narrow rooms.

Set the perforated shelf height to suit your tallest bottle, and keep opened containers above the sump so any drips are caught inside the cabinet. Label the shelf by contents, keep an up-to-date list on the door, and store acids or oxidisers in a separate cabinet rather than alongside flammables.

Manufacturer

The cabinet is manufactured by **Jain Scientific Equipments Private Limited**, operating as **ScienceLab** from Ambala in the state of Haryana. See the company profile for more.
