Product Name :

Rover Trolley Antimicrobial with Deep Trays

Product Code :

SLE/HF/52

Description :

Rover Trolley Antimicrobial with Deep Trays (Product Code: SLE/HF/52) is the medical antimicrobial Rover supplied with 3 Deep Trays, giving three separate compartments on one rugged, hygienic trolley. Like every Rover, it is designed to carry medical equipment over any terrain and to take heavy loads from place to place with ease, even up and down stairs. It comes fully assembled in silver and forms part of the hospital and laboratory furniture in India produced by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala.

Specifications

Parameter	Detail
Type	Medical antimicrobial Rover trolley
Trays included	3 Deep Trays
Colour	Silver
Movement	Any terrain; can be taken up and down stairs
Assembly	Supplied fully assembled

Typical Use

Three deep trays make it easy to keep different categories of supplies apart during a round: for instance, dressings in one tray, sealed disposables in another and patient paperwork or labels in the third. That separation is useful on ward-to-ward restocking runs, for outreach teams moving kit between a vehicle and a clinic room, and for laboratory staff carrying sample boxes and consumables between floors of a building without a lift.

Between trips the trolley can stay parked as a temporary storage point, then move again when needed. Keep the three trays labelled so returning items go back to the right place, avoid overfilling a tray above its rim, and clean the trays and handle with your usual disinfectant routine after clinical use.

Manufacturer

ScienceLab trolleys are a product line of **Jain Scientific Equipments Private Limited**, whose base is Ambala in Haryana, India. The company's range spans laboratory apparatus, educational equipment and hospital furniture — our company profile gives an overview.
