Product Name :

Runners for Trolley

Product Code :

SLE/HF/55

Email : sales@scilabexport.com
Phone: +91-7082934803

Description :

Runners for Trolley (Product Code: SLE/HF/55) are a pair of metal runners made to fit aStorage Trolley, giving a tray a track to slide in and out on. Each runner measures 30mm x402mm x 15mm, and they are supplied in pairs — one for each side of a tray position. Facilitiesmanagers order them to add tray levels, change a layout or replace damaged runners, whichmakes them a common item during school lab renovation in India and ward store refits. They aremade by **Jain Scientific Equipments Pvt Ltd (ScienceLab)**, Ambala.

Specifications

Parameter	Detail
Type	Tray runners to fit Storage Trolley
Material	Metal
Dimensions	30mm x 402mm x 15mm
Supplied as	Pairs

Typical Use

A tray-storage unit is only as flexible as its runners. Adding a pair lets you insert an extra shallow tray where a deep tray used to be, split a column into more levels for small parts such as electrodes, pipette tips or dental consumables, or re-space levels when the contents change at the start of a new school year. Metal runners are also the part most likely to be bent when a tray is forced in at an angle, so keeping a few pairs as spares avoids leaving a column half-usable.

Count one pair for every tray you want to hold. Fit both runners of a pair at the same level so the tray slides smoothly, and check that trays are fully engaged on both sides before loading them. Tell us the trolley or frame model when ordering so we can confirm fit.

Manufacturer

These runners are produced by **Jain Scientific Equipments Private Limited** of Ambala, Haryana, which sells under the **ScienceLab** brand and makes the storage trolleys and frames they are used with. Our company profile describes the company in more detail.

Related Hospital Furniture

Frames and trolleys where runners are ordered separately or added later (confirm fit when ordering):

- Single Column Frame — a tall frame supplied without trays and runners
- Double Column Frame — a two-column frame for larger tray layouts
- Treble Column Frame — a wide frame needing many runner pairs
- Double Column Trolley — a tray trolley in the same furniture range
- Castor Set of 4 — castors to make a frame mobile
